

Submission Worksheet

Submission Data

Course: IT202-007-F2025

Assignment: IT202 Module 3 HTML, CSS, JS Challenges

Student: Dylan G. (dg599)

Status: Submitted | **Worksheet Progress:** 100%

Potential Grade: 10.00/10.00 (100.00%)

Received Grade: 0.00/10.00 (0.00%)

Started: 10/6/2025 2:58:36 PM

Updated: 10/6/2025 3:50:39 PM

Instructions

- Overview Link: <https://youtu.be/Dyl6dg1Xybo>
- 1. Ensure you read all instructions and objectives before starting.
- 2. Create a new branch from dev called M3-Homework
 - 1. `git checkout dev` (ensure proper starting branch)
 - 2. `git pull origin dev` (ensure history is up to date)
 - 3. `git checkout -b M3-Homework` (create and switch to branch)
- 3. Copy the template code from here: [GitHub Repository - M3 Homework](#)
 - It includes Challenges 1-3, `util.js`, and `styles.css`. Put all into an M3 folder or similar inside your `public_html`
 - Immediately record to history
 - `git add public_html`
 - `git commit -m "adding M3 HW baseline files"`
 - `git push origin M3-Homework`
 - Create a Pull Request from M3-Homework to dev and keep it open
- 4. Fill out the below worksheet
 - Each Problem requires the following as you work
 - Ensure there's a comment with your UCID, date, and brief summary of how the problem was solved
 - Update `ucid` in header tag
 - Code solution (add/commit periodically as needed) (style and/or script tags)
- 5. Once finished, click "Submit and Export"
- 6. Locally add the generated PDF to a folder of your choosing inside your repository folder and move it to Github
 - 1. `git add .`
 - 2. `git commit -m "adding PDF"`
 - 3. `git push origin M3-Homework`
 - 4. On Github merge the pull request from M3-Homework to dev
 - 5. On Github create a pull request from dev to prod and immediately merge. (This will trigger the prod

deploy to make the heroku prod links work)

7. Upload the same PDF to Canvas

8. Sync Local

1. `git checkout dev`
2. `git pull origin dev`

Section #1: (3 pts.) Challenge 1 - Fixed Header, Content, Footer

Progress: 100%

— Section Collapsed —

Section #2: (3 pts.) Challenge 2 - Header, Content, And Sidebars

Progress: 100%

☰ Task #1 (3 pts.) - Edit the ``style`` and ``script`` tags to solve the challenge requirements

Progress: 100%

Details:

- Only make edits where noted via provided comments
- Update your ucid in the header tag
- Using CSS, adjust the layout per the following
 - #1: Header is at the top
 - #2: Content takes up the rest of the height
 - #3: Both sidebars docked to the respective side and take up 15% width; Content area should utilize the remaining width
- Using JavaScript complete the following
 - #4: Attach the appropriate event listener to the buttons
 - #5: Individual toggle the respective panel between collapsed and uncollapsed (Don't lose the button in the process)
 - #6: The content should adjust based on the status of the respective sidebars (i.e., take up more left, right, or both space)
- Add code to solve the problem (add/commit as needed)

🖼 Part 1:

Progress: 100%

Details:

Two screenshots are expected

1. Snippet of relevant code showing solution (with ucid/date comment)
2. Full output of executing the program (visit the proper file on Heroku dev after a manual

deploy) 1. Ensure url is visible in the browser's address bar

challenge 2 output

challenge2 solution part 1

challenge2 code solution part 2

challenge 2 code solution part 3

Details:

- Direct link to the file in the homework-related branch from GitHub (should end in `.html`)
- Direct link to the file on Heroku Prod (Just grab the base prod url and manually enter the path to the file)

Part 3:

Progress: 100%

Details:

Briefly explain **how** the code solves the challenge(s) (note: this isn't the same as **what** the code does)

Your Response:

For challenge 2 I used flexbox again but for this challenge it was to solve the horizontal spacing, it allowed to keep the sidebars at the 15% width and gave the rest to the main body. Another the flex allowed for was that when the sidebars were collapsed it would adapt the main body to take up the space of the collapsed sidebar. I then found that I could create a class for the collapsed function that would allow the change of width in the sidebars. Lastly with adding the click listeners that solved the problem of the buttons collapsing the sidebars.

Section #3: (3 pts.) Challenge 3 - Carousel Layout With Swiping

Progress: 50%

— Section Collapsed —

Section #4: (1 pt.) Misc

Progress: 100%

Task #1 (0.33 pts.) - Github Details

Progress: 100%

— Task Collapsed —

Task #2 (0.33 pts.) - WakaTime - Activity

Details:

- Visit the WakaTime.com Dashboard
- Click **Projects** and find your repository
- Capture the overall time at the top that includes the repository name
- Capture the individual time at the bottom that includes the file time
- Note: The duration isn't relevant for the grade and the visual graphs aren't necessary

Task #3 (0.33 pts.) - Reflection

Progress: 100%

Task #1 (0.33 pts.) - What did you learn?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

I would say that I learned a lot, with researching on w3schools and stack overflow it helped me solve the challenges. A few things that w3schools taught me would be the overflow functions and the flexbox. It also helped with a lot of some and most of the javascript. I would say that before this I didn't know much javascript but with this assignment I learned some javascript and how to use buttons especially.

⇒ Task #2 (0.33 pts.) - What was the easiest part of the assignment?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

I think that the easiest part of the assignment had to be challenge 1 because of how simple it was to solve the problem. Once I found the flexbox and the overflow functions on w3schools the challenge became quite simple. I would say that also some base knowledge from IS117 helped me out with the assignment as well.

Saved: 10/6/2025 3:48:10 PM

⇒ Task #3 (0.33 pts.) - What was the hardest part of the assignment?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

I would say that the hardest part of the assignment was getting challenge 3 to work. I would also say that the java script portion and some of the html portion was new to me so I had to end up researching on what functions and classes would help me solve the problem. The main help was w3schools it helped with a good portion of the assignment.
