

Submission Worksheet

Submission Data

Course: IT202-007-F2025

Assignment: IT202 PHP Problems

Student: Dylan G. (dg599)

Status: Submitted | **Worksheet Progress:** 100%

Potential Grade: 10.00/10.00 (100.00%)

Received Grade: 0.00/10.00 (0.00%)

Started: 9/29/2025 12:00:42 PM

Updated: 9/29/2025 3:48:05 PM

Instructions

- Overview Link: <https://youtu.be/iwA6vyRPhoM>
- 1. Ensure you read all instructions and objectives before starting.
- 2. Create a new branch from dev called M2-Homework
 - 1. `git checkout dev` (ensure proper starting branch)
 - 2. `git pull origin dev` (ensure history is up to date)
 - 3. `git checkout -b M2-Homework` (create and switch to branch)
- 3. Copy the template code from here: [GitHub Repository - M2 Homework](#)
 - It includes Problems 1-4 and `base.php`. Put all into an M2 folder or similar inside your `public_html`
 - Immediately record to history
 - `git add public_html`
 - `git commit -m "adding M2 HW baseline files"`
 - `git push origin M2-Homework`
 - Create a Pull Request from M2-Homework to dev and keep it open
- 4. Fill out the below worksheet
 - Each Problem requires the following as you work
 - Ensure there's a comment with your UCID, date, and brief summary of how the problem was solved
 - Initial outline/plan of how you'll solve it via comments (add/commit after this stage)
 - Code solution (add/commit periodically as needed)
- 5. Once finished, click "Submit and Export"
- 6. Locally add the generated PDF to a folder of your choosing inside your repository folder and move it to Github
 - 1. `git add .`
 - 2. `git commit -m "adding PDF"`
 - 3. `git push origin M2-Homework`
 - 4. On Github merge the pull request from M2-Homework to dev
 - 5. On Github create a pull request from dev to prod and immediately merge. (This will trigger the prod deploy to make the heroku prod links work)
- 7. Upload the same PDF to Canvas
- 8. Sync Local

1. git checkout dev
2. git pull origin dev

Section #1: (2 pts.) Problem 1 - Odds

Progress: 100%

— Section Collapsed —

Section #2: (2 pts.) Problem 2 - Sum

Progress: 100%

— Section Collapsed —

Section #3: (2 pts.) Problem 3 - Conversion

Progress: 100%

≡ Task #1 (2 pts.) - Edit the `bePositive` function to make each value positive, convert it back to the original data type, and set it to the proper slot in the `output` array

Progress: 100%

Details:

- Only make edits where noted via provided comments
- Challenge 1: Make each value positive
- Challenge 2: Convert the values back to their original data type and assign it to the proper slot of the `output` array
- Step 1: sketch out plan using comments (include ucid and date)
- Step 2: Add/commit your outline of comments (required for full credit)
- Step 3: Add code to solve the problem (add/commit as needed)

Part 1:

Progress: 100%

Details:

Two screenshots are expected

1. Snippet of relevant code showing solution (with ucid/date comment)
2. Full output of executing the program (visit the proper file on Heroku dev after a manual deploy)

```
function bePositive(arr) {
  // UCID: [your ucid]
  // DATE: [your date]
  // CHALLENGE 1: Make each value positive
  // CHALLENGE 2: Convert the values back to their original data type and assign it to the proper slot of the `output` array
  // TODO: Add code to solve the problem (add/commit as needed)

  let output = [];
  for (let i = 0; i < arr.length; i++) {
    output[i] = Math.abs(arr[i]);
  }
  return output;
}
```

code solution to problem 3

```
Running Problem 3 for [dg599] [2025-09-29 19:14:31]
Output: 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41 42 43 44 45 46 47 48 49 50 51 52 53 54 55 56 57 58 59 60 61 62 63 64 65 66 67 68 69 70 71 72 73 74 75 76 77 78 79 80 81 82 83 84 85 86 87 88 89 90 91 92 93 94 95 96 97 98 99 100
Completed Problem 3 for [dg599] [2025-09-29 19:14:31]
```

Part 3:

Progress: 100%

Details:

Briefly explain **how** the code solves the challenges (note: this isn't the same as **what** the code does)

Your Response:

The code solves the problem by iterating through each element and using the absolute value function to remove the negative signs. After changing them all to positive after comes the keep the values as their original type. For that the code uses type-checking if and elseif to check

Part 2:

Details:

Include the link to the Pull Request (should end in `/pull/#`)

Task #2 (0.67 pts.) - WakaTime - Activity

Progress: 100%

Details:

- Visit the WakaTime.com Dashboard
- Click **Projects** and find your repository
- Capture the overall time at the top that includes the repository name
- Capture the individual time at the bottom that includes the file time
- Note: The duration isn't relevant for the grade and the visual graphs aren't necessary

≡ Task #3 (0.67 pts.) - Reflection

Progress: 100%

⇒ Task #1 (0.33 pts.) - What did you learn?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

I learned about some of the string functions like `trim()`, `preg_replace`, `ucwords()`. Before this I had never heard of these besides `trim` because it is similar to the java one. I learned these through w3schools and stackoverflow. I also learned about the number format function, this one fixed my mistake on thinking that i could just divide by 100 to get the 2 decimal places but I forgot that it would change the overall number.

Saved: 9/29/2025 3:41:34 PM

⇒ Task #2 (0.33 pts.) - What was the easiest part of the assignment?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

I think the easiest part of the assignment was challenge1 in problem 3 because all you had to do was change the value to positive and was quite simple solution cause of absolute value. Another part that was quite easy was problem 1 whne i read he challenge i knew the solution pretty quick because i have used modulus for odds and evens before.

Saved: 9/29/2025 3:48:05 PM

⇒ Task #3 (0.33 pts.) - What was the hardest part of the assignment?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

I think the hardest part of the assignment would have to be problem 4 even though the code solution is simple and not much, I had to learn about the functions I had to use and I couldn't use previous knowledge. I also think that challenge2 from problem 2 was a fair challenge and I had to think about it and had to use trial and error cause my initial thought of dividing by 100 didn't work so i then did research and found the number_format function and how to use it.
