Instructions

- Overview Link: https://youtu.be/F_jCnIMf4Hw

1. Ensure you've followed the lessons to set up your Github, git, and VS Code
2. Fill in the below tasks (note it'll save as you go)
3. Once everything is filled in, ensure you click "Submit and Export PDF"
4. Upload the PDF to Github in a Module1 folder
5. Find the downloaded PDF and move it into the location of your local repository folder (don't use the Github upload option as we want to practice the git commands)
6. Use `git add .` to track all file changes (i.e., the PDF)
7. Use `git commit -m "Uploading M1 PDF"` to record the change and provide a meaningful message
8. Use `git push origin main` to move the changes to the remote repository's main branch (Note: Future assignments will have a dedicated branch name for their work)
9. Take the same PDF and upload it to the Canvas submission

Section #1: (10 pts.) Tasks

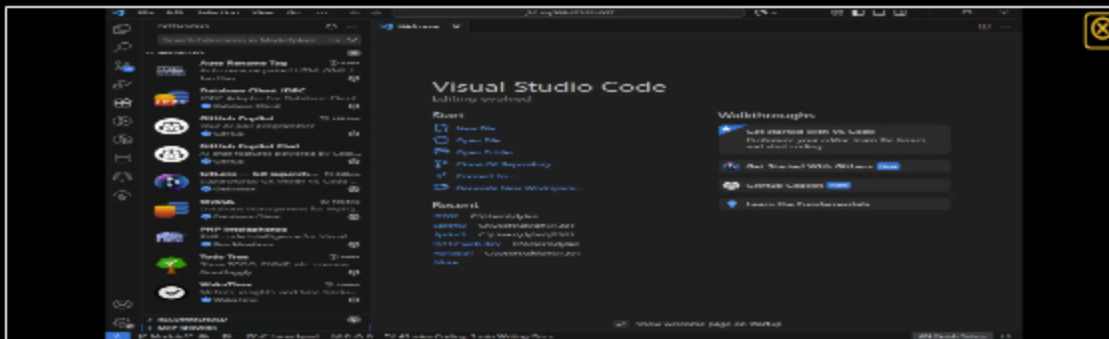

Progress: 100%

Task #1 (2.22 pts.) - Screenshot of VS Code Extensions for this class

Progress: 100%

Details:

- Ensure you have the following extensions
 - PHP Intelephense
 - WakaTime
 - Git Lens
 - MySQL Extension

Extensions screenshot

 Saved: 9/15/2025 12:01:24 PM

Task #2 (2.22 pts.) - Screenshot of WakaTime Setup

Progress: 100%

Details:

- Visit the WakaTime site
- Click the "Projects" tab and find your repository and select it
- Include a screenshot of the top part that shows the overall time and the repository name
- Scroll down and screenshot the bottom portion that shows the individual files/branches and include that. (You won't need to capture the visuals)

Waketime top part

Files		Branches	
24 mins	src/main	32 mins	Frontline: mainline
8 mins	src/main	15 mins	main
7 mins	src/main		
2 mins	src/main		
2 mins	src/main		
1 min	src/main		
20 mins	public_html/index.php		
7 mins	public_html/test_00.php		
5 mins	public_html/propagator.php		
1 min	public_html/README.md		

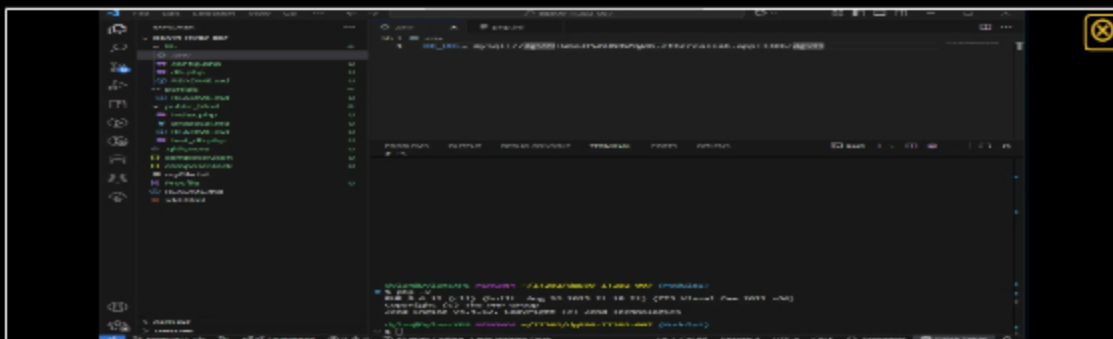

Waka time bottom part

Task #3 (2.22 pts.) - Demonstrate that you have PHP available

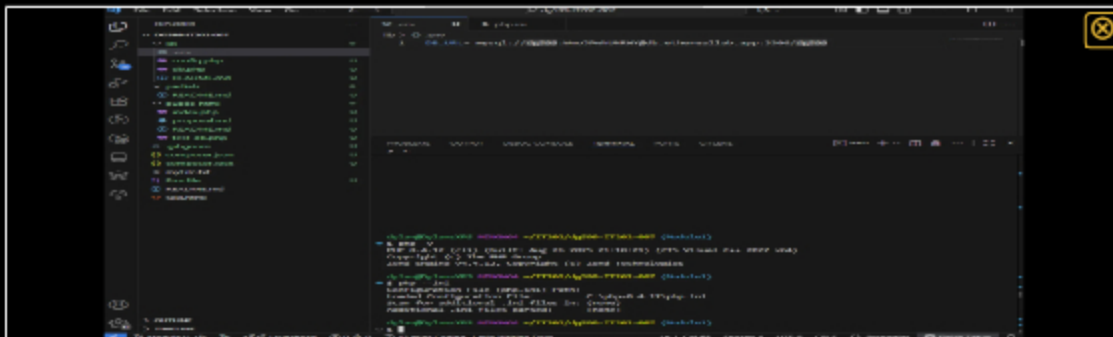

Progress: 100%

Details:

- Run `php -v` in the terminal
- Run `php --ini` in the terminal
- Record the output (both should work and show proper configuration).

php version

php ini

Task #4 (1.11 pts.) - Provide Info about your Github Repository

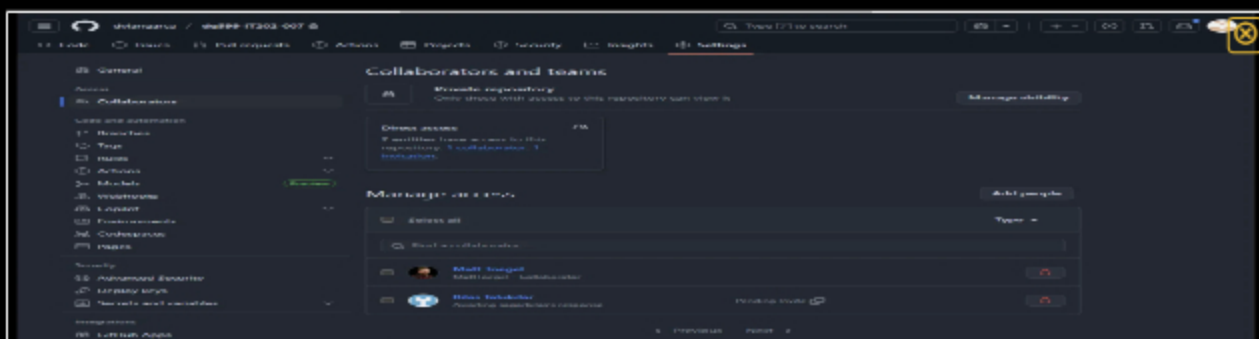

Progress: 100%

Part 1:

Progress: 100%

Details:

Show the Collaborators page with an invite sent out to me **MattToegel** and the grader(s) (if applicable: see Canvas announcements)

Part 2:

Progress: 100%

Details:

Share the link to your github repository. The url should be in the form of

<https://github.com/username/ucid-course-section>

URL #1

<https://github.com/dylangarca/dg599-IT202-007>

URL

<https://github.com/dylangarca/dg>

 Saved: 9/15/2025 12:15:30 PM

Task #5 (2.22 pts.) - Reflection

Progress: 100%

Details:

- Did you have any issues/problems this module? If so, what were they and how did you solve them?
- Did you learn anything new this module? If so, provide some brief details.
- If both answers were no, briefly explain your prior background.

Your Response:

The only issue that I had was getting the php -v to work. And the way I fixed that was opening the repository folder instead of having my IT202 parent main folder.

Most of the things we did regarding git and vs code I already knew because of 114. The only thing that was new to me was the database setup and the php setup

process.
